

China 2026

PROJECT LIGHTNING TALK:

Atlantis:

Terraform Pull Request Automation for Cloud Native Teams

Rui Chen · Atlantis Maintainer

Shanghai, China · September 8, 2026

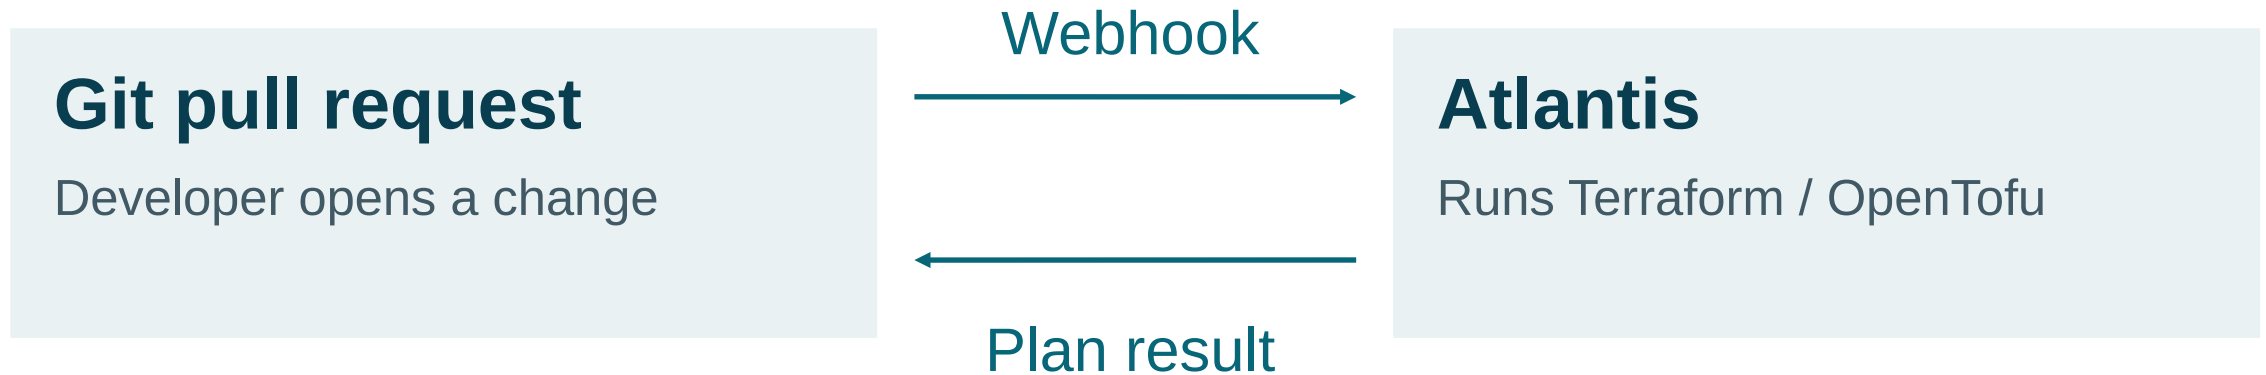

Code review needs the execution result.

Which plan? Who applied it? What happened?

Open a PR. See the plan.

Review the code and the plan together.

Review it. Request the apply.

Pull request

Review + configured approval

Atlantis

Checks requirements; executes

atlantis apply

Execution result returns to the PR.

Infrastructure

Via provider APIs

One change. One PR conversation.

infra: resize production database

Atlantis **Plan: 0 to add, 1 to change, 0 to destroy**

Reviewer Approved

Rui **atlantis apply**

Atlantis Apply complete.

Illustrative PR · approval requirement configured · apply before merge

Connect your platform tools.

Git hosts

GitHub · GitLab
Gitea / Forgejo
Bitbucket
Azure DevOps

IaC execution

Terraform / OpenTofu

Terragrunt via
custom workflows

Review context

Conftest → policy
Infracost → costs

Optional integrations

Shared PR workflow · configurable execution

Run Atlantis in your infrastructure.

Kubernetes

Official Helm chart

Containers

Official Docker image

Server / VM

Run the Atlantis binary

Cloud examples in the docs

AWS Fargate · Google Cloud · Azure

What the Atlantis community uses
