

Atlantis:

Terraform Pull Request Automation for Cloud Native Teams

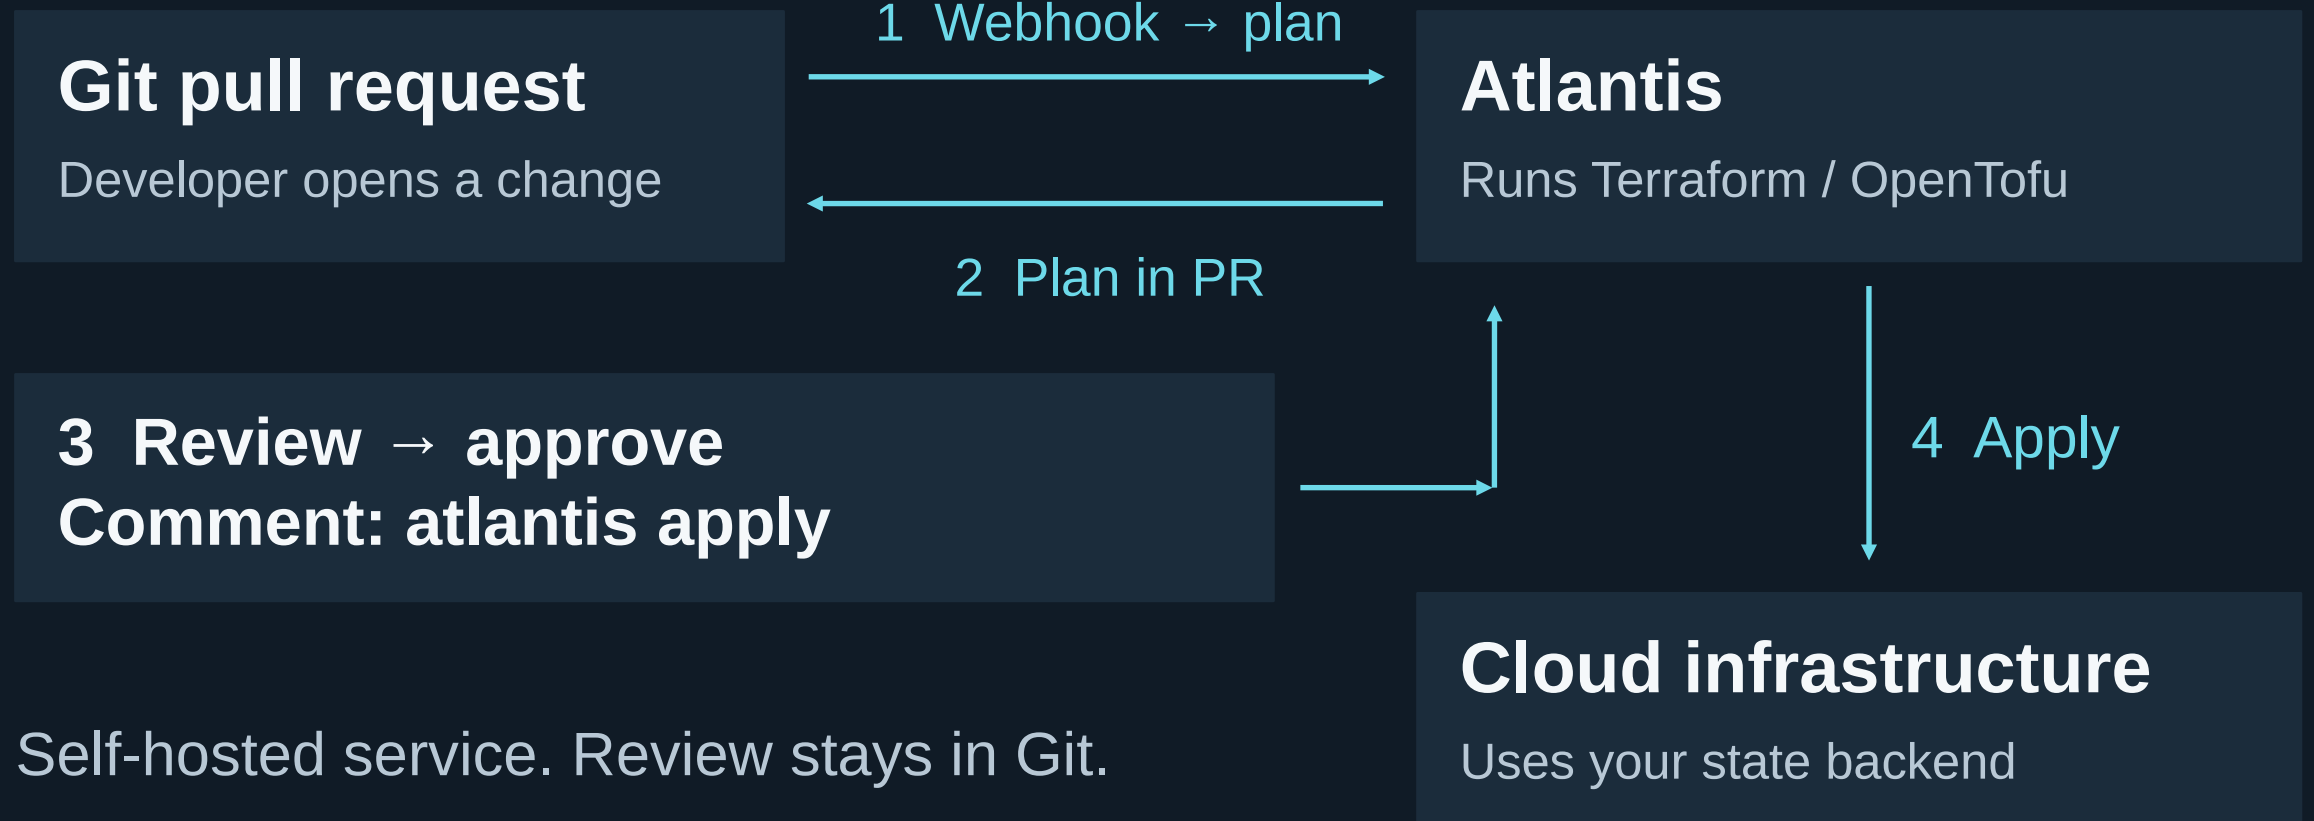

Rui Chen · Atlantis Maintainer

KubeCon + CloudNativeCon + OpenInfra Summit
+ PyTorch Conference China 2026

Shanghai, China · September 8, 2026

The pull request becomes the workflow.

Self-hosted service. Review stays in Git.

One change. One PR conversation.

infra: resize production database

Atlantis **Plan: 0 to add, 1 to change, 0 to destroy**

Reviewer Approved

Rui **atlantis apply**

Atlantis Apply complete.

Illustrative PR · approval requirement configured · apply before merge

A shared workflow. A platform you control.

01

Visible

Plan + execution results
beside the code review.

02

Controlled

Configured approvals,
policies + project locks.

03

Collaborative

Developers propose.
The platform runs it.

Self-hosted · Kubernetes / Helm, or a server

Today: alpha drift APIs · v0.47.1 command-injection fix

Infrastructure is code.

Plan it.

Review it.

Apply it.

From the pull request.
