

China 2026

PROJECT LIGHTNING TALK:

Atlantis:

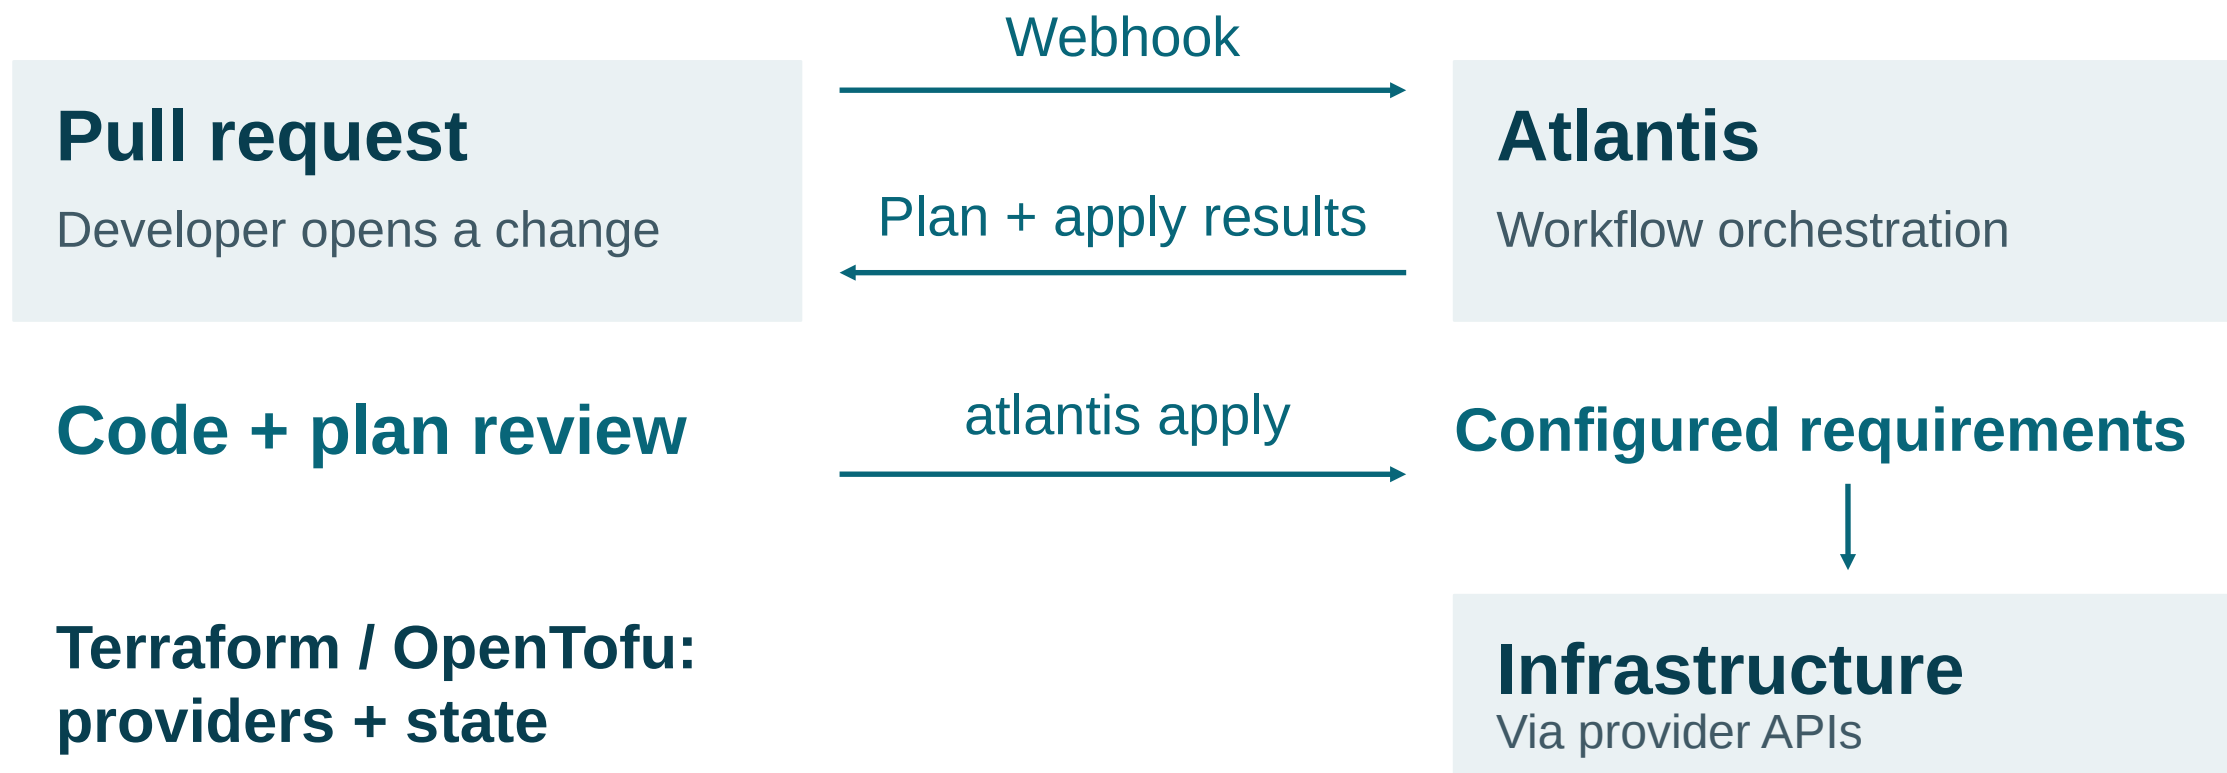

Terraform Pull Request Automation for Cloud Native Teams

Rui Chen · Atlantis Maintainer

Shanghai, China · September 8, 2026

The pull request becomes the workflow.

One change. One PR conversation.

infra: resize production database

Atlantis **Plan: 0 to add, 1 to change, 0 to destroy**

Reviewer Approved

Rui **atlantis apply**

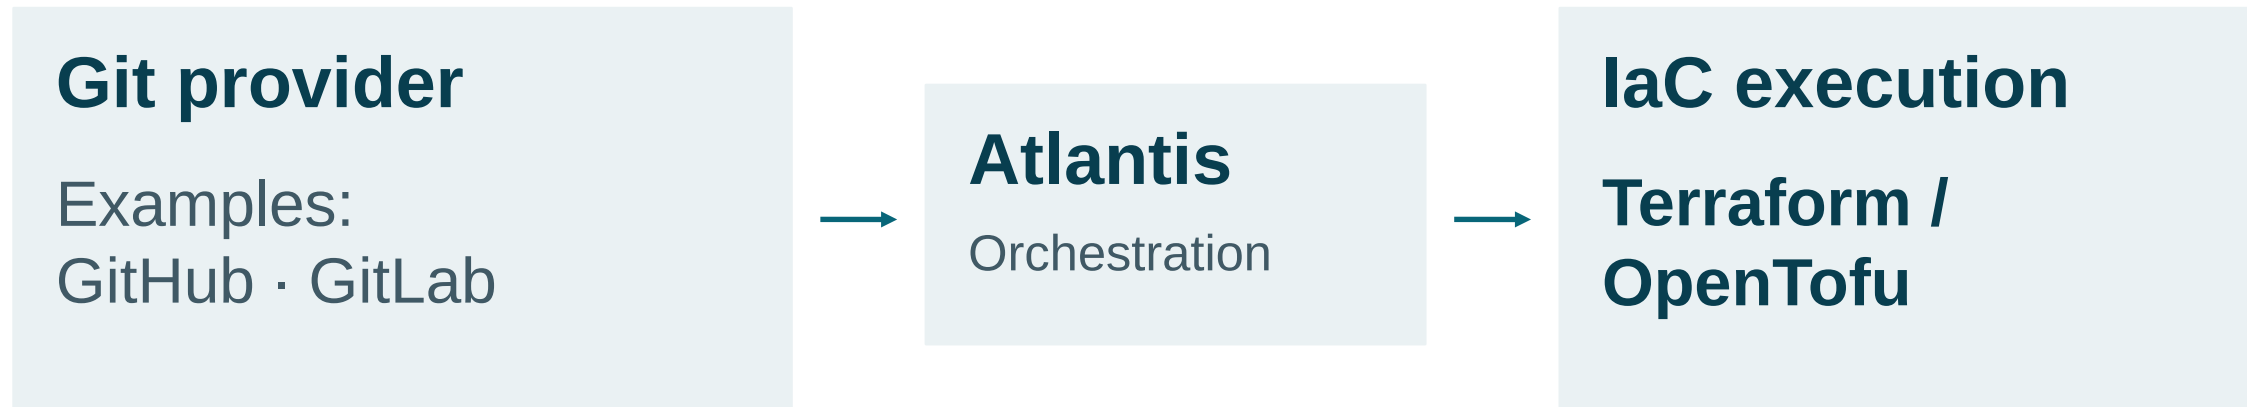

Atlantis Apply complete.

Illustrative PR · approval requirement configured · apply before merge

Shared review. Controlled execution.

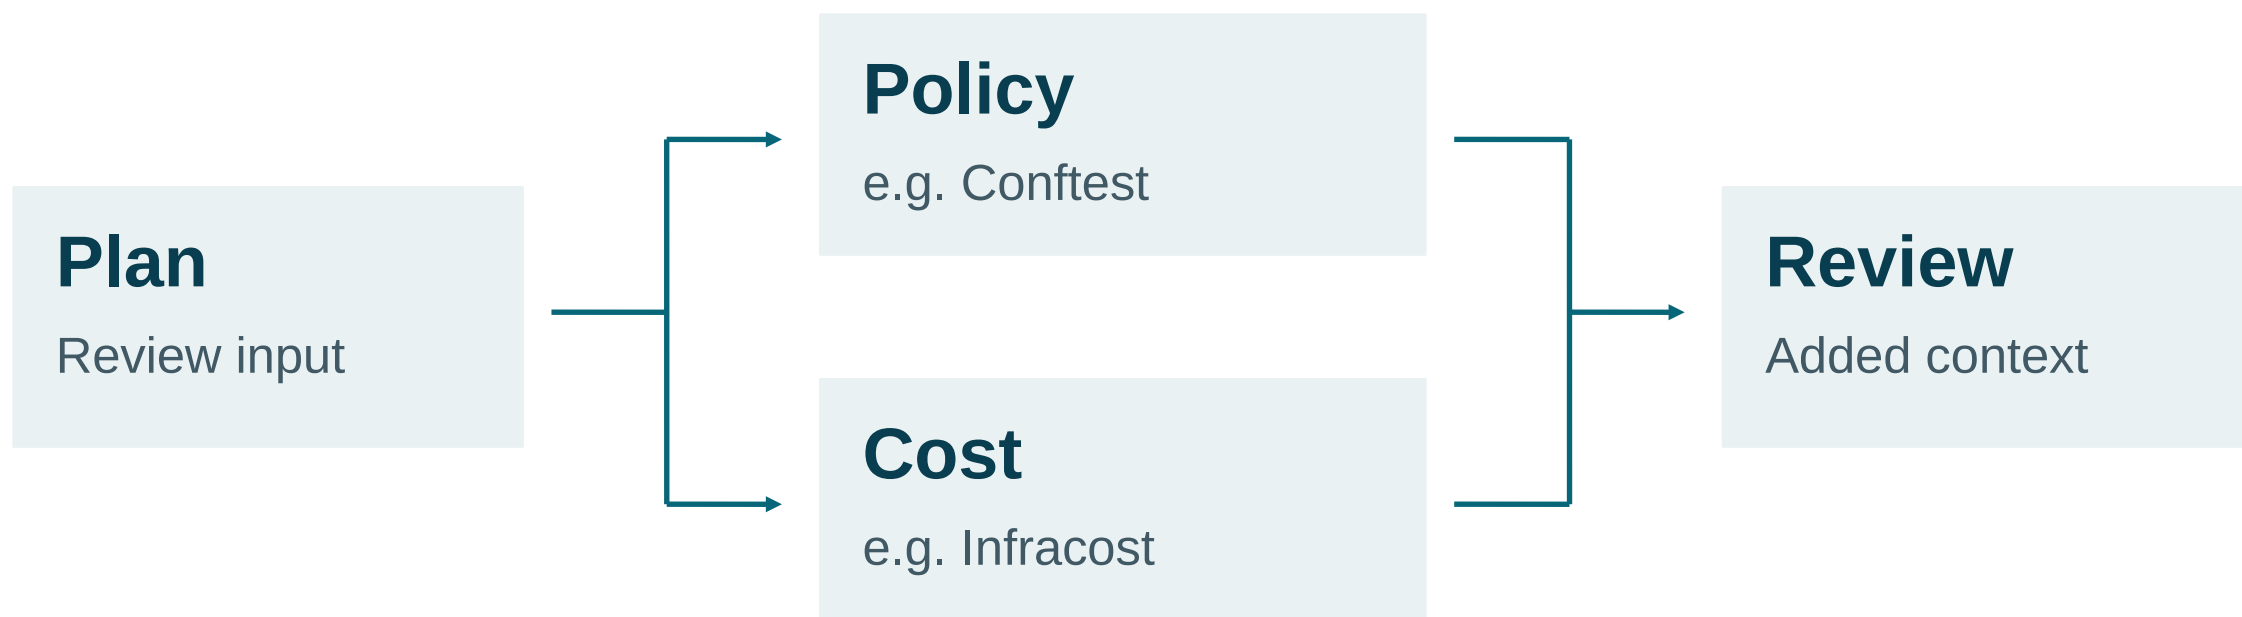

- **Visible** Plan + result beside the code
- **Controlled** Centralized execution + requirements
- **Collaborative** Developers propose; platform rules govern

Connect Git to your infrastructure tools.

Purpose-built infrastructure PR automation

Extend the pull-request review.

Custom workflows compose your own tooling.

Run Atlantis in your infrastructure.

Kubernetes

Official Helm chart

Containers

Official Docker image

Server / VM

Run the Atlantis binary

Self-hosted. Kubernetes is optional.

Multiple stacks. One PR workflow.
